Ayush Srivastava

AI Engineer | Applied AI | Generative AI | Software Engineer

+91 6393951701 | Noida, Uttar Pradesh, India | AyushSri5

ayushsri5201@gmail.com | Ayush Srivastava | Leetcode

PROFILE SUMMARY

- Nearly 3 years of experience across **AI engineering, backend systems, and scalable architecture design**.
- Currently Software Developer at **Sinch**, delivering **high-impact, AI-ready distributed systems** in enterprise platforms.
- Hands-on expertise in **Generative AI,** RAG pipelines, LLM integration, vector search, and semantic retrieval systems.
- Delivered measurable outcomes including **60%** system load reduction**, 90%** payment success rate, and **40%** faster onboarding.
- Unique strength in **Impact-Driven Optimization, Scalable Architecture & Reliability Engineering, Product-Centric Automation mindset**.

WORK EXPERIENCE

Software Developer | Sinch
Sep'24 – Present | Noida, Uttar Pradesh, India

- Developed AI-ready backend systems supporting **high-throughput enterprise platforms**.
- Designed event-driven architecture; reduced API load by **60%** using Kafka and RabbitMQ.
- Built onboarding and billing systems; increased activation by **35%** and reduced time by **40%**.
- Implemented microfrontend architecture; reduced release dependencies by **45%**.
- Optimized payment workflow; improved success rate from **60% to 90%**.
- Reduced deployments from **5 cycles to a single release**, eliminating rework.
- Optimized MongoDB and SQL queries; reduced latency by **30%**.
- Strengthened security using Keycloak with MFA for enterprise-grade access control.
- Managed Docker and Kubernetes deployments for scalable and reliable infrastructure.

Software Developer | Compro Technologies
Sep'23 – Sep'24 | New Delhi, India

- Developed full-stack systems supporting **10,000+ active users** in production.
- Reduced production issues by **30%** through backend optimization & refactoring.
- Improved customer satisfaction by **25%** via performance and stability improvements.
- Optimized database queries; reduced system latency and bugs by **40%**.
- Automated workflow; increased efficiency by **70%** and reduced manual errors by **20%**.
- Streamlined API documentation; reduced delivery timelines by **20%**.

PROJECT

AI-Powered Chatbot Platform (Generative AI + RAG System)
2026

- Built RAG-based system using **LangChain, OpenAI SDK, and vector databases** for contextual QA.
- Designed ingestion pipeline for PDFs, websites, and transcripts into structured embeddings.
- Implemented semantic search using **QdrantDB** to improve retrieval accuracy.
- Integrated **Gemini API with ranking engine** to enhance response precision.
- Applied LLM guardrails ensuring domain-restricted and reliable outputs.
- Developed MongoDB-backed system for scalable content retrieval.

CORE COMPETENCIES

AI Engineering & Applied AI Systems

Generative AI (LLMs, RAG, Prompt Engineering)

Vector Search & Semantic Retrieval

Microservices & Event-Driven Systems

Backend Engineering & APIs

Performance Optimization & Reliability

AI-Powered Product Development

Automation & Workflow Optimization

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java

AI/ML: PyTorch, Scikit-learn, LLM Fine-tuning (GPT-4, Llama 3), Prompt Engineering

AI Frameworks & Tools: LangChain, CrewAI, OpenAI SDK, Gemini API

Vector & Data Systems: QdrantDB, Pinecone, MongoDB, SQL

Backend & APIs: Node.js, FastAPI, RESTful APIs

Frontend: React, Next.js, Vue.js, Nuxt 3, Tailwind CSS

Data Pipelines & Messaging: Kafka, RabbitMQ

DevOps & MLOps: Docker, Kubernetes (Rancher), BentoML

Monitoring & Observability: Grafana, Evidently.ai

Security: Keycloak (AuthN/AuthZ, MFA)

Architecture: Microservices, Module Federation, Vector Search, Semantic Ranking

EDUCATION

B.Tech. (Information Technology)
JSS Academy of Technical Education
2019 – 2023 | Noida, Uttar Pradesh, India

PERSONAL DETAILS

Date of Birth: 5th February 2001
Languages Known: English, Hindi
